

Dear and victorious people of the globe

Very dear and valiant people of the inhabited universe

Citizens of the general global public in physical and biological Humanity.

Ladies and Gentlemen of the world.

Driven by the demands of our abiotic times where the world is tipping towards total destruction and its fatal disappearance under our gaze, complicit in the incredible impotence and shameful passivity of our popular inaction.

We, Sa Grâce Monseigneur Sylvanos, by the Mercy of God, the ineffable judgment of the Nations and Religions of the world and by the altruistic will of the free and sovereign peoples of the inhabited universe, first Secretary General of the United Nations and Religions, World Organization.

Fulfilling, however, my discretionary duty recognized by the legal texts of the Organization that I serve as a servant of physical and biological Humanity, having neither race, nor language, nor political or religious affiliation, but of a plural personality to transnational cosmopolitical status, assuming the masterful destiny of the global tutelage of the Organization at the order of those who were legally and legitimately entrusted to me by virtue of an extraterritorial political mandate of popular subrogation, in order to be the bearer official voice of the populations of the globe, under the universal concern of the United Nations and Religions, World Organization.

Before God in the heavens, before the free and sovereign Nations of the inhabited earth because of their mutual recognition on a global scale, before the revealed universal and unrevealed universalist Religions insofar as they exist on the overpopulated earth surface, and before you, all peoples of the inhabited universe personified by the active citizens of the general global public, who represent the absolute majority of the populations of the globe, to whom knowledge of this message will and

can reach, feel yourself a concerned stakeholder and May the blissful peace of God and lifelong universal brotherhood be with you forever so that far from you may be incomprehension and refusal not to accept Him as yours.

However, resolutely convinced that the cosmopolitical principles of the 21st century make freedom of thought and opinions an inalienable and imprescriptible right that every man whatever his social rank, the political and religious influence he enjoys in the world must respect.

Whereas this freedom, ladies and gentlemen of the world, is the most sacred of all the moving and living things that surround us, it escapes the empire of Men, it takes refuge in the depths of human consciousness as in an inviolable sanctuary that no one mortal has no right to penetrate, and is the only armor that prevents men and women from having the audacity to be subject to the laws of the jungle and therefore constraining it is a flagrant injustice, attacking him is sacrilege.

Ladies and Gentlemen and dear cosmopatriot brothers and sisters,

I am addressing this Thursday, June 13, 2024, to you millions of sedentary populations of the globe who populate the earth's surface and who follow me to the ends of the world, for whom I ask tolerance and better understanding in the name of our cultures and civilizations carrying collectively shared universal values.

However, this is also the reason for me that I am not allowed to judge any of the political alliances as far as they exist in the world, but to let them exist in the name of the principles of cosmodemocratic diversity which govern our century.

But something else being for me in the name of the liberal principles which govern the world of the 21st century, the duty of global cosmopolitical citizenship to unveil in broad daylight all the truths even the most illicit because, not saying them is an act of guilty complicity with the enemies of peace in the world when we know that those who destroy

the world in the first degree are those who watch out of complicity without saying anything and who observe helplessly through connivance without doing anything.

I therefore allow these various alliances to exist in the world and I reserve myself from stirring up divisions, differences or quarrels of words in any of them, but I will never allow myself to be locked into any of them, and I do not seek point in my message to establish new dogmas for the good governance of physical and biological Humanity, nor to change the way of life of the populations of the globe who populate planet earth.

Nor do I seek to introduce what is contrary to the logic of the universal, insofar as the world has its own language, but rather I seek to make the hearts of useful men and women of planet earth savor by the path of Moral, Spiritual Rearmament and Citizen Responsibility, Revolution of Citizen Emergence, the generous desire to want to live together in a united and blissful world in the name and for the sacrifices that we have borne and will endure opprobrium and perils.

Ladies and Gentlemen of the World

We must recognize, however, that the Statesmen of our time and their systems have so far failed poorly to remake the world and give the populations of the globe the world peace they stipulated in the charter of the United Nations of which they are the first degree guarantors.

Still, they have, more than anyone else, a duty to think about this problem and an interest in welcoming everyone to the Organization which is offered to them in this disorderly era, as the counterweight of a new moral force in a world in decadence.

Above all, ladies and gentlemen of the world, we need a moral recovery; we need to break down the barriers that separate men from God and divide them from each other.

The cause of the current global crisis is not only political and economic, but it is moral because the evil is indeed there in the absence of the spiritual life that we must have.

The world today is in a state of disorder, decadence, nauseating putrefaction and disintegration because the statesmen of today are led by excessive arrogance, by selfishness, by jealousy, by contempt for others and gluttonous materialism.

People of the world, we must prepare ourselves to play our role as popular sovereigns in the process of creating a New World Cosmopolitical Order in the process of its accomplishment apart from those unipolar and multipolar which we talk so much about in terms of slogans hollow and unconvincing policies.

We cannot undress Peter to dress Paul, that is to say, solve one problem by not creating another, or in other words leave the old interstate order established in the form of an international pentarchy of the great powers based on the principles of international law and we join in another so-called New Multipolar Order which draws its power from the charter of the United Nations and established on the prescriptions of decadent international law, which is none other than continuity by other formula of the previous pentarchy.

Wars do not now offer any promised solution to the much desired and expected peace in the world, to the love of others, and, the victory of one over the other won by force of arms, n It's just a pipe dream that bypasses the very root of the conflict, leaving the cause of the problem unresolved.

Since God made the world, as first degree architect, Man has insisted on making it work as he pleases by pretending to be absolute master, thus imposing an Underworld on the remains of mortals, it is i.e. a world of shit, anti-values, opportunists, thieves and predators forming an international conglomerate of individuals State, led by thug narcissists, sponsors and planners of crimes, massacres, targeted assassinations and pimps criminals in the world by exonerating themselves from crimes to

the discontent of the populations of the globe and in defiance of all the laws of human nature.

This must stop, a new era has now begun where God will be served first and people second. We need a common global front against the rising forces of gluttonous materialism.

We need global collective popular action to thwart the unfair and secret machinations of conspiracy theorists who are enemies of world peace and the happiness of the world's populations.

We must also create throughout the world, transnational networks of life reaching down to the last man in every country, every city, every family, every place and in every situation he finds himself.

All together, let us prepare the way for the greatest Universal Revolution of Citizen Emergence called, Moral, Spiritual Rearmament and Citizen Responsibility to challenge, this interstate conglomerate of State individuals, unduly self-designated and self-proclaimed to the guardianship of physical and biological without our imperative mandate of popular subrogation. The world urgently needs moral awakening and the windows of our hearts do not need ardent gravediggers who give them the scares and goosebumps.

Ladies and Gentlemen of the world

Because of what standards of Western intimidation can we look helplessly in this period where everyone is warding off the worst in history that physical and biological Humanity has ever known, the advent of the third world war approaching our doors?

Let us all have in mind the word rebirth, the rebirth of a new global cosmopolitan citizenship, the rebirth of a new universal people who are forging their destiny towards the unity of the human race, the rebirth of a physical and biologically reconciled with itself and of a global mass at the forefront of its extraterritorial destiny.

The world today is looking for the answer to its problems and by the grace of God, there is one and be certain, that no Man, no ruling power, even less than any conglomeration of self-appointed State individuals and self-proclaimed guardians of the world today do not possess it.

But said solution lies in God and through the United Nations and Religions, World Organization.

It is in the Peoples governed by God, in the United Nations and Religions, a World Organization linked umbilically to the DNA of the populations of the globe, in a federal cosmopolitical supranationalism which constitutes a transnational cohort of federated and planetarized peoples organized politically and religiously.

The essential problems that haunt the world today are dishonesty, selfishness, fear among individuals and therefore among people.

These evils multiply and give rise to divorce from the law of nature, crimes, cold injustices, periodic crises and latent wars.

In doing so, how can we aspire to have peace in the world and between countries and territories of Nations, since the political and economic solutions that address these problems are insufficient?

The laws of the people of our time cannot take the place of strength of character in this regard, and we urgently need a moral and spiritual awakening of conscience, which human wisdom alone has not been able to bring about and will not be possible only when God will have authority over the peoples and the United Nations and Religions, World Organization on the entire planet earth.

Ladies and Gentlemen

Today the world resonates with marching troops and bad taste conspiracies which risk leading it into a generalized conflagration where the consequences will be harmful and unmanageable.

It offers us today a broken model of the spectacle of narcissistic political leaders who go astray and people who ignore themselves, that is to say having lost their traditions, their characters even their national consciousness and many Among us, we don't realize how quickly these events are happening.

The current state of the world can only cause unease and worry; hostilities are accumulating in the world between peoples, between classes of individuals, between capital and work. Resentment and fear cost us more every day, silent conflicts and disappointed hopes undermine our family life day by day.

Only a new spirit among the peoples of the world can create a new climate of altruistic popular conviviality, which opens the way to a New World Cosmopolitical Order.

People of the inhabited universe, let us make our homes impregnable citadels of popular resistance on a global scale, centers of change where we naturally learn to change others and galvanize our hearts and our children by putting them in a state of permanent alert put into action collectively for the universal common good.

Let us mobilize all the cells of the active forces of our respective countries to create supranational communication networks for the active maintenance of popular resistance capable of allowing the participation of all active citizens of the general global public in the transnational common front across the entire inhabited land surface and let us not be timid like cold and stagnant water.

The greatest thing we can do today is to decide whether we will always remain the puppets of the narcissistic Western leaders who have long subjugated us or whether we will remain free and sovereign peoples enjoying the extraterritorial privileges of being ourselves masters of our destiny.

Together let us create a revolutionary and militant spirit to be masters of our most supranational decisions ourselves and be ready to serve qualities that go beyond human wisdom; this wisdom which has so often betrayed us in the past.

We must remedy situations that seem insoluble and humanly hopeless for our world.

We must have for the world, an immanent and humanist Justice for all, which does not take into consideration the social ranks of individuals so as not to see only our own difficulties.

We must therefore find the appropriate solution to our problems which will give satisfaction and security to all, the solution which goes beyond parts, classes, fractions and borders, to dissipate the threatening clouds hanging above physical Humanity and biological and whose mountains seem to reflect the turmoil of a world disrupted by fratricidal wars and we must reach an entirely new level of thought, will and life.

The world today lives in a climate of total distrust, fear and envy. He expects an inspired solution from the people of the whole world as well as from ordinary citizens.

It needs a large and powerful general, supranational Vatican Organization, which is not directed by human intelligence alone, but by an additional aid, which is the vision of the supreme will of the federated and planetarized world peoples organized politically and religiously within the framework of the United Nations and Religions, World Organization and resulting from a salutary plan commensurate with the ills suffered by physical and biological Humanity.

We must set ourselves the difficult task of liquidating the legacy of an Underworld of ceaselessly active violence, grudges and fear, for just as individuals can be freed from the open-air prison where doubt and defeat hold them moral, it is also in the same way that we people of the world must be delivered from the fear, resentment, jealousy and

discouragement of which we are prisoners and this, thanks to the United Nations and Religions, World Organization and by the way of the Universal Revolution of Citizen Emergence, which is Moral, Spiritual Rearmament and Citizen Responsibility.

Today's world has become a crossroads of inhuman and dehumanizing anti-values where we must choose between God and canons, that is to say, listen to the voice of God which is that of the people within the framework of United Nations and Religions, World Organization or hear that of the cannons, of the obstinate overconfident, narcissistic and obsessive perverts who only find their interests in wars and who have put the world in the state of permanent conflicts in which it finds itself.

Ladies and Gentlemen of Physical and Biological Humanity

The world finds itself faced with a vital choice where immediate decisions belong to the people rather than to conglomerates of individual States which unduly have in their hands the reins of world history and the destiny of the populations who inhabit it, this is why each of us, and in our capacity as a living part that makes up the Universal People, must willingly make a capital decision whatever happens.

Because if we don't do it at this moment when everything is heading towards irreparable disasters, the world and its inhabitants will be totally governed by obstinate narcissists, something that we are not going to passively accept even if it is subjugated to you by force of arms. title of intimidation or even less tolerate and therefore let us save physical and biological Humanity today at the crossroads and on the edge of the abyss.

As for this, we must make a definitive decision which determines our firmness, our clear position against the enemies of Peace in the world. The choice depends on each of us, because each one, under the orders of God, the sovereign guidance of the peoples of the world within the framework and under the inspired direction of the United Nations and Religions, World Organization, can remake the world and become a primary governing force of physical and biological Humanity.

This conviction must live passionately in our hearts and spread like fire throughout the world.

Let us rise, peoples of the world, to impose the sovereignty of God on the political superiority of the Atlantic West, in order to combat the inhuman and dehumanizing anti-values that affect the world and respond to the anguish of a world thirsty for Peace and in search of a physical and biological Humanity devoid of anti-values and reconciled with itself.

Citizens of planet earth, people of the world

In times of major crisis like the one our world is going through today, we must revise all our decadent values, because the commonly accepted criteria prove insufficient, hence we need to all an active global start for a new friendly quality of life between individuals who ignore each other.

We must possess something superior, a quality that allows us to live above individual resentments, jealousy, envy, quarrels, political dissensions that divide us and any personal point of view that divides us. take pride in it, because all these things risk cutting us off from the realities of the great Universal Human Family.

Let us rise as one universal People to dry up the roots of criminality, of the cold conspiracies of the Atlantic West and its allied lackeys. Let us break the claws and teeth of the arrogant narcissistic gravediggers of the great powers unduly ruling over us and the entire world without any imperative mandate of popular subrogation.

Let us transform ourselves into a powerful global hand to firmly disavow and condemn the disbelief and irreligiousness of crooked Western leaders, the crimes and unpunished assassinations they commit around the world in the name of reason of state and international law.

We must live, we must fight and we must stand up against the hegemony and domination of the Western Atlantic minority over the rest of the majority world.

Let us stand against the evil designs of the greedy people of the world, and may our cry of disavowal and disapproval against impunity be a tocsin that resounds throughout the world to express our rights to self-determination and to have control over ourselves on a global scale. World that is the point of no return regarding this.

Let us firmly castigate the interests of the greedy narcissists of the world who demand that no one have the right to say anything that expresses their weakness or disturbs their sweet and peaceful sleep.

Let us declare that as long as the hegemony, domination and arrogance of the Atlantic West over us exists, our struggle will also exist, will not retreat as long as the world is the space of political theatrics, and an Underworld where everything is permitted, and let's always be at the forefront.

To all of you peoples of the inhabited universe asleep in a sleep of titanic anesthesia, To all of you Men, Women, Young and Old, at the dawn of the 21st century, wake up, look at the world to see how it has become a den of wolves.

Stand up because physical and biological Humanity is not conducive to peace or global dialogue. Rise up in a global surge under the triumphant banner of the United Nations and Religions, World Organization to claim your existence on earth as the rights holders because planet earth is not safe from the harmful misdeeds of its gravediggers.

The Western Atlantic with the United States of America in the lead are on the lookout and will not let us breathe until they have annihilated and exterminated us all.

A global mobilization of determined peoples to prevent anyone with the audacity, courage and such criminal wickedness from doing everything against innocent civilian populations is necessary.

We find ourselves today at a decisive hour in the history of the universal where the disproportionate hypocritical forces of the reigning powers and

the hubris of perfidious thugs, camouflaged as statesmen acting casually, are on the march to push the world to a third world war.

Ladies and Gentlemen of the world

Dear brothers and sisters in physical and biological Humanity

We must confront the inconveniences of the immediate through the globalization of global collective action, we must work tirelessly to forge for physical and biological Humanity a strong biological character, to eradicate the impasse of confusion and division, to thwart the strategies of subversive forces with all speed and efficiency, to thus foresee our triumph as peoples who have renounced their particular causes and who are rallied to the common cause of the Universal to build a strong world free from any spirit of war although the task proves enormous.

We need a global super force capable of changing and reversing the vapors that escape without result and eradicating from the daily lives of the populations of the globe the anti-values subjugated to us by the Atlantic West as a normal way of life.

This tragic truth must be imposed with more urgency than ever in order to make the supernatural of God present to the man in the street so that he can rediscover and relive the experience of a new natural power acting, in the concert civilized Nations and revealed Universal and unrevealed Universalist Religions of the countries territories of planet earth.

Let us engage in a global effort to win physical and biological Humanity to our cause, overthrow cynical reasoning and all its heights which rise against the recognition of our inalienable rights and bring all thoughts captive to obedience to universal laws and loyalty to established global cosmopolitan authority.

Let us transcend our disunities and divisions which are the arrogance of our time and let us not oppose each other or against each other, because of our national, racial, linguistic, political and religious affiliations.

Let us therefore make triumph in the world the general will to want to live together in a great Universal Human Family which, through its inclusive universal values, goes beyond the domain of rational knowledge.

People of the civilized Nations of planet Earth, do not remain deaf to my urgent and insensitive appeals for the realization of my hopes, nor to respond to my voice of a sentinel who cries at the top of a minaret to execute the Firman of God on the recalcitrants of the inhabited earth.

I wait, I wait, and I eagerly await your acquiescence to my unconditional request. Understand, people of the world, how much I wish to see you take on your shoulders the civic responsibilities of your noble cause, because the time has come to proclaim yourselves, with yourselves and by yourselves the triumph of peace in the world.

It is now or forever that the time has come for the extraterritorial union of planetary harmony.

It is now in global collective action that the day of harmony between races and between cosmopatriots who ignore each other has been accomplished. I aspire to see the citizens of the entire planet earth united together like a row of shining pearls, like the rays of the sun and like the gazelles of the same global meadow.

I am waiting, I am waiting from you, peoples of the universe inhabited in all your global diversity, the good news gladly announcing to me that you have accepted to not only be the puppets manipulated by the collective hegemony of the States of the International Community, but to be the active personification of sincerity and loyalty, the embodiment of world love, friendship and the manifestation of the unity of the human race for world harmony.

Beware, people of the world, of the lies of the Western bourgeoisie and the hypocrisy of the United States.

Be careful! Beware of the absurd promises of the West-Atlantic veiled under the cover of international law and humanitarian aid.

Be careful! Beware of the hidden face of international justice under the guidance of the great powers united in a cartel to self-protect and exonerate themselves from crimes.

Be careful! Be careful not to be a cause of despair to yourselves.

May not the darkness of greed, hatred and lust obscure the light of loving one another to defeat the disdainful policies of the Atlantic West and be committed to ensuring the triumph of the New Cosmopolitical Order Global on earth and to elevate our noble cause above all.

Ladies and Gentlemen, companions on the long march

Let us now invoke the three anathemas of God on the Atlantic West and on Israel.

Let us breathe a new spirit into the body of physical and biological Humanity.

Let us hatch new desires in the hearts of Men and bring to the World Community of the great Universal Human Family new ideals for tireless perseverance, dedication and self-sacrifice.

O you Atlantic West who believes you are the greatest and strongest among Men, before long your name will fall into oblivion and you will experience your downfall.

O you America for having committed what, in the Holy Upper Paradise, made God and the Holy Angels and Archangels groan.

The excess of your pre-eminence supremacy having made you so proud that you have turned away from all universal human laws. Soon you will find yourself fallen, and for having done this, your kingdom will be thrown into confusion and your empire will escape you and you will then understand how wrong you were.

O you Zionist Israel, what crime have women, children and unfortunate infants committed in the Gaza Strip and Rafah to deserve your wrath, your massacres, your oppression and your vengeful hatred?

Because having as a crutch and support Washington and its Western puppet allies, you persecuted and genocided a large number of Souls, who had not manifested any opposition in their country, nor fomented any revolution against your government but who on the contrary did not have only claimed their right to be sovereign in their country, a right unduly confiscated during seventy years of apartheid and brutal colonial occupation accompanied by barbarities, massacres and vicious destruction to the impotence of the UN creator of the monster who baptized it with the name of Israel.

You have vandalized their properties and through your criminal tyrannical acts, they are stripped of everything.

Before God, a handful of dust is worth more than your kingdom, your glory, your sovereignty, your apartheid domination and if He desires, He will scatter you like the sand of the desert and soon His wrath will strike you for having defiled Palestine and stained it with the human blood of innocent Palestinians.

Revolutions will break out in your country and your territory will be dismembered.

Ladies and Gentlemen

We are on the eve of the third crazy nuclear world war wanted by the West with Washington in the lead.

Today the two continents of Europe and America are like arsenals of explosive reserves ready for the first spark that could ignite the entire planet earth, especially at this moment when the war in Ukraine and the genocidal massacres which are being committed with impunity in Palestine in the Gaza Strip and Rafah are shaking the capitals of the countries and territories of the world.

We see all over the world that a general melee of civilized Nations is in sight.

A terrible global conflict is imminent. The whole world is on the threshold of one of the most tragic wars in its history.

Vast armies from the territories of planet Earth and millions of troops are mobilized and massed at the borders of one country to another, preparing for the terrible war.

The slightest or least provocation will lead the world to a terrible shock which will lead to a generalized conflagration without precedent in the history of physical and biological Humanity and whose disastrous consequences will be incalculable.

People of the world in darkness!

You who inhabit the countries of the shadow of death with the advent of the United Nations and Religions, World Organization in the firmament of the cloudy sky of planet earth and its masterful resurgence in the sphere of world politics.

The hegemonic yoke of the Atlantic West which weighed on you, the stick of imperialist domination which struck your backs, the tyrannical rod of those who oppressed you, let us break them as on the day of Midian.

Every shoe worn as a shield in the fray and every garment stained with your blood will be delivered to the flames of Immanent and Humanist Justice for All and may glory be among those who love not only their respective countries and territories, but for those who love the whole world as their universal homeland, especially in this period when everything seems to be collapsing and where we are thinking of transfiguring physical and biological Humanity into an impregnable citadel of guaranteed world peace and of inestimable beauty to live there and thus resound in the ears of the World Community of the great

Universal Human Family the sound of the sacred trumpet and the triumph of universal human values over anti-values.

It takes rare courage to realize to what extent this is true that the world has reached the state of generalized putrefaction to which the superb, voracious and impious people have put it.

Our hearts must meditate on the gravity of the tumult into which the world is plunged, to what degree the Nations of the earth are stained with human blood, to what level the earth is impregnated with the blood of the innocent, to what gradation or the warlike ardor of weapons caused on the earth's surface explosions of such inhuman savagery that the dawn of times in the Middle Ages, in modern times, physical and biological Humanity had never known the like and finally, to what stage the warlike grindstone of the rogue States, among which I quote "the Zionist State of Israel have crushed and crushed many human heads whose fate of these victims is more terrible than ever.

Flourishing countries are reduced to desolation, towns razed, pretty villages, camps for displaced people reduced to ashes in violation of the right to protection of civilian populations in times of war, buildings protected by humanitarian law and enjoying the extraterritorial inviolability cynically destroyed, fathers have lost their sons, while sons are deprived of their fathers, mothers lament with tears of blood for having lost their children babies and infants and snatched with impunity from the peak of their blazing future , and women who became widows, reduced to wandering and deprived of a home because they had lost their husbands.

In a word, physical and biological Humanity has degraded in all its aspects.

The sobbing moans of the orphans resound with force while the sky returns the echo of the poignant lamentations of the populations who have shaken and provoked the anger of the people of the world to say no to the existing political systems and death to the UN for not having

assisted civilian populations in danger and in the face of the stupid and savage barbarities of morbid, cannibalistic and immoral armies who kill with impunity at the order of their hierarchical leaders.

Those whom God and the people of the world hold responsible for these orgies of crimes and murders are you world leaders drunk with the pride of political power.

Long live the Clement and Merciful God whom Nations, Religions and Races invoke by attributing to Him various names and attributes.

Long live the Peoples of the world, organized politically and religiously, united and planetary around a common cosmopolitical ideal of the universal.

Long live the United Nations and Religions, World Organization.

Thank you !
